ABOUT A THOUSAND JOYS

A Thousand Joys (ATJ) promotes and supports the development of resilient, joyful, and engaged individuals and organizations. We create powerful partnerships with schools and community-based organizations that serve high-needs communities and support them in fulfilling their missions.

ATJ helps educators and nonprofit staff meet the needs of students and clients that have experienced trauma, while also addressing their own vicarious or secondary trauma. ATJ uses a variety of methods to develop their capacity via training, coaching and leadership development as well as direct service to children. By cultivating their own resilience and social-emotional capacity, educators and nonprofit staff are better able to foster those skills in others.
